PROFILE

MSc Data Analytics student with an IT Engineering background and practical experience in Python, R, SAS, SQL, SAP ABAP, and Power BI. Skilled in data cleaning, statistical analysis, regression, machine learning, dashboard reporting, and technical documentation. Seeking a Graduate Data Analyst or Junior Data Analyst role in the UK.

EDUCATION

MSc in Data Analytics 2026
University of Brighton, United Kingdom

Bachelor of Engineering 2023
Information Technology
Mumbai University, India

CERTIFICATION

SAP Certified Development Specialist
ABAP for SAP HANA 2.0
Certificate No. 0025823234

ACADEMIC PROJECTS

Explainable Machine Learning for the Classification of Potentially Hazardous Asteroids Using NASA JPL Orbital Data 2026
Master's Data Analytics Project

Developed machine learning models to classify potentially hazardous asteroids using NASA JPL orbital and physical data. Performed data preprocessing, exploratory analysis, feature selection, class imbalance handling using SMOTE and class weighting, model comparison using Random Forest, XGBoost, Logistic Regression, and applied SHAP explainable AI techniques to identify key asteroid risk factors.

BOB Online Fashion Retailer Case Study 2025
Business Analytics Strategy and Practice
Proposed predictive analytics for premium product up-selling using CRISP-DM, customer segmentation, and revenue-growth analysis.

King County Housing Dataset Analysis 2025
Data Mining and Knowledge Discovery
Analysed house prices using Python, statistics, visualisation, correlation, preprocessing, histograms, boxplots, scatter plots, and heatmaps.

King County House Price Prediction 2026
Data Mining and Knowledge Discovery
Built a Python machine learning regression system to predict house prices. Trained Linear Regression, Decision Tree, Random Forest, Neural Network, and Stacking Ensemble models. Evaluated results using MAE, RMSE, R^2 , and 5-fold cross-validation.

Google Play Store App Ratings Analysis 2025
Statistical Data Analysis with R
Cleaned app data, studied rating factors, compared free and paid apps, and built regression and random forest models.

Statistical Modelling and Classification Report 2026
Multivariate Analysis and Statistical Modelling
Built and compared statistical models in RStudio using logistic regression, LDA, classification trees, PCA, factor analysis, MANOVA, ROC, AUC, and cross-validation.

Housing Sale Price Analysis 2026
Programming for Analytics with SAS
Analysed house sale prices using data cleaning, visualisation, descriptive statistics, correlation, PROC GLM regression, and robustness checks to identify key price factors.

TECHNICAL SKILLS

SAP: ABAP for HANA 2.0, WebDynpro, Module Pool, Smart Forms, Data Dictionary, Modifications and Enhancements

Programming: Java, Advanced Java, Python, R, SAS, OOP

Database: SQL, MySQL

Analytics: Data Cleaning, Data Visualisation, Regression, Machine Learning Basics, Power BI, BI Reporting

Web: Front-end and Back-end Development

Software: PyCharm, RStudio, SAS Studio, SAP

Design: AutoCAD, SketchUp Pro, Live Home 3D Pro, Adobe InDesign, Google Earth Pro

CORE STRENGTHS

Data Analysis: Data cleaning, visualisation, descriptive statistics, regression, correlation, BI reporting, ROC, AUC, cross-validation, and machine learning basics.

Programming: Java, Advanced Java, Python, R, SAS, SQL, MySQL, SAP ABAP, and web development.

Technical Support: IT and civil project documentation, GIS-based records, land acquisition files, and technical coordination.

PPP / Worldwide Awaydays Database Design 2025
Data Management

Designed a database for guests, parties, bookings, suppliers, and payments. Covered BI questions, star schema, GDPR, and database security.

Survival Analysis of the Cholangitis Dataset 2026
Medical Statistics

Performed survival analysis in R using Kaplan-Meier curves, log-rank tests, Cox regression, backward AIC model selection, hazard ratios, forest plots, concordance, likelihood ratio tests, and assumption checks.

Medical Statistics Case Study 2026
Medical Statistics

Analysed clinical datasets using two-proportion tests, chi-square tests, Fisher's exact test, Poisson regression, negative binomial regression, risk ratios, odds ratios, Bayesian odds ratio analysis, sample size calculation, and study design evaluation.

Land Acquisition Cost Prediction 2026
HS2 Technical Support Project Experience

Created and managed a 1000m GIS-based dataset for land acquisition records, engineering drawings, project documents, and technical coordination.

Placement and Salary Prediction Android App 2023
Mumbai University

Created an Android app to predict student placement chances and salary trends using machine learning concepts.

Tourism Management Website 2023
Mumbai University

Developed a tourism management portal with front-end, back-end, and MySQL database support.

Fire Detection System with Water Sprinkler 2023
Mumbai University

Built a fire safety system using sensor-based fire detection and automatic sprinkler response.
